

The Veterans Program

The **Veterans Program at Ascend Hospice** is a special hospice program for our patients who have served our country in the Armed Forces. Our goal is simple: to serve as a source of comfort and support by addressing the unique emotional needs of veterans and their families.

Through embracing a holistic and personalized approach, we seek to focus on the **Mind, Body** and **Spirit** of each individual. A special recognition ceremony is provided for each veteran. The goal of this ceremony is to acknowledge and validate the service and sacrifice of our veterans and their families.

With our strong emphasis on education, Ascend Hospice has trained all staff members on the most commonly found issues that pertain to our veteran population. Community education is also supported and provided to increase awareness of veteran and family needs.

“Live today and every day like a man of honor.”

– Charles Eliot
